

GADDAM HRISHIK REDDY

+91-9849115898 | hrishikreddygaddam@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [GeeksforGeeks](#)

PROFESSIONAL SUMMARY

Computer Science student specializing in Machine Learning and Data Science. Experienced in developing end-to-end NLP pipelines, deep learning models, and time-series forecasts. Passionate about turning complex data into actionable insights and seeking roles to build, optimize, and deploy scalable ML solutions.

EDUCATION

IIITDM Kancheepuram

B.Tech. in Computer Science and Engineering; GPA: 7.97/10.00

Chennai, Tamil Nadu

Aug. 2023 – Present

Narayana Junior College

Intermediate Education in Mathematics and Science; Score: 98.6%

Hyderabad, Telangana

May 2021 – May 2023

TECHNICAL SKILLS

- **Languages:** Python, SQL, C++, C
- **Machine Learning:** Regression, Classification, Decision Trees, Random Forest, SVM, Naive Bayes, KNN, K-Means, PCA
- **Deep Learning:** MLP, CNN, Transformers
- **Libraries and Frameworks:** Scikit-learn, Pandas, NumPy, NLTK, Matplotlib, Seaborn, Streamlit
- **Tools:** Git, GitHub, Jupyter Notebooks, Linux/Bash
- **Problem Solving:** Solved **320+** DSA problems across LeetCode and GeeksforGeeks
- **Additional:** Prompt Engineering (*Currently learning*)

PROJECTS

Reddit Skill Trend Forecasting | *Python, PRAW, NLP, Machine Learning*

- Built an end-to-end pipeline that scraped and structured **10,000+** Reddit posts from technical subreddits to analyze emerging skill trends.
- Engineered a custom **Weighted Skill Score** using mention frequency, engagement signals, and **VADER** sentiment for richer trend analysis.
- Benchmarked gradient boosting models against baseline regressors to forecast 2026 demand patterns and identify growth areas in the AI ecosystem.

Fake News Detection System | *Python, Scikit-learn, NLP, Streamlit*

- Designed a text classification system that achieved **94% accuracy** with **Naive Bayes** after comparing common baseline models.
- Created an NLP preprocessing workflow with **tokenization**, **stop-word removal**, and **TF-IDF** feature extraction using **NLTK**.
- Deployed the model in a **Streamlit** application for interactive real-time predictions and easy demonstration.

Pediatric Bone Age Prediction | *Python, Deep Learning, ResNet50, Transfer Learning*

- Developed a medical imaging model to estimate pediatric bone age from hand X-rays using the RSNA dataset.
- Used **ResNet50** as a feature extractor to handle limited labeled data and produce strong image embeddings.
- Optimized a regression head with Mean Absolute Error as the main evaluation metric to ensure prediction quality.

Electricity Bill Prediction | *Python, Scikit-learn, Regression, Model Tuning*

- Constructed a regression-based prediction pipeline using structured tabular data, evaluating models such as linear regression, decision trees, and random forests.
- Conducted exploratory data analysis (EDA), feature preprocessing, and cross-validation to enhance model selection and prediction robustness.
- Streamlined an experimentation workflow to optimize baseline modeling and hyperparameter tuning practices.

EXPERIENCE

Training and Placement Cell, IIITDM Kancheepuram

Placement Coordinator

- Managed communication with HR representatives from companies and maintained accurate records.

Chennai, Tamil Nadu

May 2025 – Present

CERTIFICATIONS

BCG GenAI Job Simulation (Forage) | Certified SQL Intermediate (HackerRank) | Python Coder (Kaggle)
